

2025-2026 SPONSORSHIP PACKET

FRC Team 2554 - The WarHawks
John P. Stevens High School, Edison, NJ

WHAT IS FRC?

The FIRST Robotics Competition (FRC) is an annual challenge in which thousands of teams of high school students worldwide compete to design the best robot for the current year's game in a short period of time and with limited resources. Teams play against each other at events to earn points and advance to the next competition level. FRC is an excellent opportunity for students to gain experience and have fun in the STEM field in a way that involves teamwork, coordination, and ingenuity.

ABOUT OUR TEAM

Our team, The WarHawks (#2554), was established in 2008 and is currently over 15 years old. Team 2554 is based in John P. Stevens High School in Edison, NJ. Its current mentor is Mr. Kevin Kearney, who teaches robotics, electronics, and mechanical skills. Our school has a reputation for talent in STEM and many students intend to pursue careers in that area. Additionally, Edison's unique demographic composition allows for significant diversity within the team, promoting collaboration and innovation among students of differing backgrounds.
